

MADE TO MEASURE. WITH MAXIMUM SAFETY.

WHEN THINGS GET HOT, THEY KEEP COOL.

VDE TOOLS FROM STAHLWILLE.

The VDE range of products from STAHLWILLE - these tools allow you to work safely in »live« environments up to 1,000 volts - as accurately and efficiently as professional end users have come to expect of this brand. VDE-compliant tools by STAHLWILLE combine intelligent product design that is optimised to benefit users, high-grade materials, tight tolerances, outstanding ergonomics and long service lives with resilient, durable protective insulation. Each individual product - from open-jaw spanners and screwdrivers through to ratchets and torque wrenches - is certified to VDE standards by stringent test procedures and marked with the seal of approval for maximum safety.

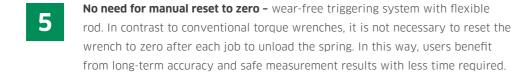

Rapid adjustment without having to dismantle - end-users can easily readjust the tool themselves - without having to send it in or have it retested.

QuickRelease - The ratchet insert tool can easily be switched from clockwise to anticlockwise use. The QuickRelease safety lock enables rapid tool changing but effectively protects against lost tools.

VDE fine-tooth ratchets - the 80 teeth mean the ratchet angle is a tiny 4.5°, which allows the craftsman or craftswoman to apply exactly the right amount of force, even in confined spaces. They also provide optimum protection against live voltages in accordance with VDE standards.

- **VDE screwdrivers -** extremely resilient to loads with effective protection against voltages up to 1000 volts. Handles with optimised ergonomics and tactile feedback that ensure ideal force transmission and strain-free working.
- **VDE single-ended open-jaw spanners & single-ended ring spanners -** they not only provide protection against electric shocks, they also enable more efficient, safe working coupled with durability, because they use a double-T profile.
- Comprehensive VDE toolkit in a case and compact VDE tool sets the ideal storage solution for mobile work.
